## Summary

I'm an IT professional turned full stack developer who is passionate about making the world a better place through code and meaningful products. As a result of being in a field that is constantly changing and requires continuous learning, I thrive in ambiguity. I value collaboration and the beauty of building something greater than the sum of its parts.

## Projects

### MatchMe

Dating app that allows your friends and family to match you with potential partners. | [Source Code](#)

- Created all wireframes and implemented the front end design using jQuery mobile to improve the user experience.
- Wrote the algorithms for gender, age, and other user preferences used to generate potential matches for the user.
- Implemented self-referential Active Record relations for database schema, and wrote all validations and user models.

Technologies: Ruby, Rails, Postgres, Javascript, HTML5, CSS3 jQuery Mobile, Heroku, Cordova, Pusher, Twitter-Typeahead, Omni-auth.

### PGTV

Clone of IMDb(Internet Movie Database) | [Source Code](#)

- Implemented all routes using RESTful convention in controller and views.
- Created user login and authentication using custom methods and helpers.
- Enabled ability for nested comments and ratings system that is viewable to authorized users only.

Technologies used: Ruby, Sinatra, Postgres, ActiveRecord, HTML5, CSS3.

### Food Drop Off

Terminal application that shows you where you can drop off donations based on your current location. | [Source Code](#)

Technologies used: Ruby, JSON, NYC Open Data, CSV, Terminal .

## Employment

### The Bridge Church

Web Developer & Urban Missions Intern

New York City

Jun 2015 to Current

- Design, create, and develop the **website** equipped with podcast, live stream, payment system, events calendar, and much more.
- Coordinate and lead fundraising events from start to finish with church leaders using Slack and Microsoft Office.
- Assist local churches in Brooklyn through evangelism and church planting on behalf of the North American Mission Board.

Technologies used: Wordpress, HTML, CSS, SoundCloud, CloverDonations, YouTube.

### Foursquare

Support & Content

New York City

Jul 2014 to Dec 2014

- Helped translate the Foursquare app into Spanish using the Smartling software in a team of two. Also wrote the Spanish translation for the app store description, email launch campaign, and company blog post.
- Worked directly with engineering and product to triage and troubleshoot bugs via Asana, and followed up with users directly.
- Created and published company blog posts on tumblr as well as the social media channels including Facebook, Twitter, Instagram, etc.
- Sourced and published content on behalf of over forty major brand partners like CNN, WSJ, TimeOut, Food Network, and NY Post.

### Apple Inc.

Apple Store Leader Program Associate

New York City

Sep 2011 to Jun 2013

ASLP is a 2-year immersion into all aspects of operating and managing an Apple Store. I was mentored by Market Leaders, participated in corporate training, and helped guide and direct store teams. I helped execute product launches, internal talent selection and hiring, as well as work with the corporate Business Teams.

- Coordinated daily operations for 100-150 employees. Constantly review customer experiences to find solutions to improve customer journey and drive store conversion rate.
- Coordinated strategy to double on-time appointments at the Genius Bar; used individual performance data to coach employees and provide in-the-moment feedback.

### JP Morgan Chase & Co

Technology Analyst - Investment Bank

New York City

Jan 2009 to Aug 2010

Corporate Development Program (CDP) is a rotational internship within Operations across the firm.

- Conducted quality assurance software testing for the private client workstation program.
- Created instructional guides for the use broker dealer services technologies acquired from a third party for internal use.
- Helped implement SharePoint and LinkedIn for 362 new hires/interns in the Corporate Development Program.

## Volunteering

### Brooklyn on Tech · Tech Flex Mentor

Sep 2014 to Current

Brooklyn On Tech's mission is to inspire the next generation of tech thought leaders emerging from the borough of Brooklyn, New York. The organization is committed to developing the interests of students and professionals in the fields of technology by providing them with meaningful academic and professional advice as they progress through the Tech Flex Scholars program.

### CHIPS · Volunteer Coordinator

Dec 2014 to Current

CHiPS, a Park Slope charity that serves the hungry and homeless regardless of faith, race or ethnicity, is supported by local churches, synagogues, civic groups, and volunteers. I coordinate volunteers from The Bridge Church once a month to cook, serve, donate, and partner with CHiPS on various events.
